

Appln. No. 09/883,290
Amd. Dated 11/3/2003
Reply to Office Action of 10/2/2003

Remarks

This case has been reviewed and analyzed in view of the Official Action dated 2 October 2003. The Examiner restricted the application due to the fact that the Examiner believes there are two inventions, namely, Group I directed to Claims 1-5 drawn to a method for determining biological heat potential of reaction system; and Group II directed to Claims 6-15 drawn to a device for determining biological heat potential.

Applicant, by this Response to the Restriction Requirement and Amendment has canceled Claims 6-15 from this case. Thus, Applicant elects Claims 1-5 for further prosecution.

It is now believed that the subject patent application has been placed in condition for examination and such action is respectfully requested.

Respectfully submitted,
FOR: ROSENBERG, KLEIN & LEE
